**Question 2**

2. Bug Report Writing During testing, you encountered a few issues when the user tried to upload a profile picture. Write a bug report detailing these issues.

<u>Bug Report</u>

Bug ID	BUG_0001
Type	Functional
Summary	Issues with Profile Picture Upload Functionality
Priority	High
Severity	Critical
Steps to Reproduce	1 . Go to the user registration page. 2. Try to post a profile picture that is more than 2MB in size 3. Submit the form. 4. Try to post a profile picture in file format such as `. bmp` or `. tiff`. 5. Submit the form. 6. Provide a valid image format (for instance `jpg` or `png`) and then fill in the form. 7. After submitting the form, go to the user profile page and see.
Attachment	screenshots of the errors

Environment	- Google Chrome - Windows 10 / Mac OS
Expected Result	- The system ought to provide an error message if the file size exceeds 2MB. - The system is used to alert users when files in unsupported formats are uploaded and stop them from doing so. - To ensure the right file format and size, the profile photo needs to be submitted and viewed on the user profile page.
Actual Result	- When attempting to upload a file of size more than 2MB, there is no error message given and the image is not uploaded. - Any format files can be chosen and uploaded but no photo is displayed on the profile page and the system does not respond. - Sometimes after submission even the supported formats such as . jpg, . png} may not appear correctly and the
